Education

Manipal University Jaipur **Aug. 2023 – Jul. 2027**
B.Tech in Computer Science (Data Science) | CGPA: 8.1/10.0 *Jaipur, India*

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS, Machine Learning, Deep Learning, NLP, Generative AI

Experience

The Hera Cubra Group **Jun. 2026 – Present**
Software Engineering Intern *Remote*

- Built an automated API-driven email outreach system that contributed to **$40K in profit** within one month.
- Built a localized website-generation platform automating site creation and deployment, reducing acquisition and hosting costs by **30%** and generating **$2K in sales** with 9 qualified leads.

ThinkCraftLabs **Aug. 2025 – Nov. 2025**
Full Stack Developer Intern *Remote*

- Built a full-stack 3D design and manufacturing platform with a **51-product catalog**, 3D visualization, authentication, orders, and admin workflows.
- Designed REST APIs and integrated frontend, backend, database, and cloud services, deploying across **Vercel, Render, and MongoDB Atlas**.

Projects

ResumeBuild | *AI Job Platform – Python, FastAPI, PostgreSQL, FAISS, OpenAI* **GitHub**

- Built an AI job platform using **Python, FastAPI, PostgreSQL, and FAISS** for resume parsing, semantic retrieval, and multi-signal job matching.
- Implemented RAG-based personalization, LLM-powered workflows, ATS analysis, Playwright PDF generation, and REST APIs for application analytics.

PolySplit | *Data Platform – Next.js, TypeScript, PostgreSQL, Prisma, REST APIs* **GitHub**

- Built a data-driven platform integrating live external market data with processing, market resolution, reputation tracking, and application workflows.
- Engineered PostgreSQL models, REST APIs, and background workers for data processing, reconciliation, automated resolutions, and reliable transaction workflows.

Research & Publications

HireIndex: RAG-Enhanced AI Recruitment Platform **Feb. 2026**
2025 8th International Conference on Emerging Technologies in Computer Engineering (ICETCE), IEEE Xplore

- Developed a RAG-based recruitment framework integrating **DistilBERT, SBERT, and FAISS** for semantic candidate-job matching.
- Implemented adversarial debiasing, equalized-odds post-processing, and **SHAP** interpretability for fair and explainable AI.

Technical Skills

Languages: Python, Java, C++, SQL, JavaScript, TypeScript
Data & Knowledge: PostgreSQL, MySQL, MongoDB, FAISS, Data Modeling, Schema Design, Data Manipulation, Query Optimization
AI / ML: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG, Hugging Face, OpenAI, Pandas, NumPy
Cloud & Infrastructure: AWS, GCP, Docker, Linux, CI/CD, Vercel, Render, MongoDB Atlas
Backend & Automation: FastAPI, Node.js, Express.js, REST APIs, API Integration, Background Workers, Automation
Engineering: Data Structures & Algorithms, Object-Oriented Programming, Distributed Systems, Git, GitHub
